

## Set up SSO for academic institutions

If you have an entityID and/or an Athens Code, please contact [customer services](#) with those details. When this information has been added you will find your institution name listed in the appropriate drop down menu on our [Federated Access login page](#).

If your institution is a member of a country federation such as those listed on the [EduGain site](#) then your 'Identity Provider' (IdP) metadata should automatically be imported into our system. Also, you should automatically have the Springer Link 'Service Provider' metadata

For further information visit <https://idp.springer.com/help/sso>
